PRODYOGIKI'19

Long Coding Challenge

A coding competition has now become somewhat mandatory in every technical fest now a days. These competitions attract a lot of passionate, hardcore coders proficient in different programming languages. To spice up PRODYOGIKI, Team ISTE has organized a 'LONG-CODING COMPETITON' where programming skills of the participants in the time restriction will be tested.

Event Details:

1. The event will consist of 8 questions of varied difficulty level.
2. Time duration of the event will be 5 days.
3. The competition will be held on an online platform (e.g. Hackerearth).
4. Prior registration to the competition is required.
5. Participants have to login through their registered Email IDs.
6. The participants should login 15 mins prior to the start of competition and read all the details properly. No extra time will be provided.

Scoring:

- The difficulty of question will determine the total marks allotted to the question.
- The details of marks for each question will be provided when the participant logs in during the competition time.
- Partial marking will be done.
- The total no. of test cases in a question will determine the marks for each test case.
- Passed test case will be awarded with suitable marks and no marks shall be deducted for the wrong solution.

Judging Criteria:

PRODYOGIKI'19

The total marks at the end of competition will determine the winner. Highest scorer is the winner and in case of a tie – "lesser the time taken, better the rank" criteria will be followed.
